

## Lux Carbon Standard – LuxCS

### Accredited Project Developers

This document represents the list of Project Developers accredited to LuxCS, and aims to provide transparency and publicity to the general public, the market and regulatory bodies, following the best national and international corporate governance practices, about the *stakeholders* who work directly with the certification processes defined in the **Triple C Protocol standard**.

Project Developer is the nomenclature used for technical professionals responsible for technical analyses, project preparation and conducting measurements for annual checks, **independently and autonomously**.

To be accredited to LuxCS, these professionals need to pass Sufficiency Exams, have extensive knowledge of the certification process, the LuxCS electronic platform and the methodologies for project development, as well as be duly registered with the respective Professional Council and able to perform their duties.

It is essential to emphasize that the Project Developers **do not have any employment, financial or hierarchical relationship with LuxCS**, acting completely independently and autonomously.

Blumenau, SC, February 22, 2024.

---

**Pedro Guilherme Kraus**  
*Chief Executive Officer – CEO*

---

**Ivan Xavier Junior**  
*Chief Operating Officer – COO*

---

**Thiago Pamplona da Silva Müller**
